

Trend Micro™

WORRY-FREE™ BUSINESS SECURITY

Fast, effective, and simple-to-manage protection - so you can focus on your business

Just like larger companies, smaller organizations and businesses need to make the most of limited budgets and resources. And when it comes to IT security they need protection that fits their unique requirements. Enterprise security solutions or consumer products take too much time to manage and will not do.

Trend Micro™ Worry-Free™ Business Security software solutions provide fast, effective security that will have minimal impact on your computers' performance.

Worry-Free means it runs quietly in the background so you can focus on your business. It does this via cloud computing, using global threat intelligence from Trend Micro™ Smart Protection Network™ to stop threats before they reach your computers. With Worry-Free Business Security, you get high-end, enterprise protection without the management hassles or costs.

TREND MICRO™ WORRY-FREE™ BUSINESS SECURITY ADVANCED

Worry-Free Business Security handles your network device protection so you and your employees can focus on what you do best, running and growing your business.

It is designed for those businesses that require data loss prevention through email; spam blocking before and on the Exchange Server; and protection for Macs as well as PCs.

Now compatible with Windows 8, Worry-Free Business Security Advanced allows you to use your PCs and Macs without fear of interruption or data loss. It is security software that doesn't require any IT expertise and won't affect your network's performance or slow down your devices.

TREND MICRO™ WORRY-FREE™ BUSINESS SECURITY STANDARD

Also compatible with Windows 8, Worry-Free Business Security Standard is a scaled-down version of the Worry-Free Business Security Advanced solution. Unlike Advanced, Standard does not protect Macs. It does not filter emails for data loss or provide an extra layer of spam filtering. It also does not protect MS Exchange servers. The Standard version is fast, effective, and easy to manage, just like the Advanced version.

Refer to the chart on the back page, to see the difference between the two versions.

CLOUD-BASED SECURITY

All Trend Micro threat-based security solutions rely on Trend Micro™ Smart Protection Network™. This cloud-based security infrastructure delivers global threat intelligence for proactive protection. It does this via cloud computing, using global threat intelligence from Trend Micro™ Smart Protection Network™. This cloud-based security infrastructure performs threat database correlation, behavior analysis, and uses worldwide threat sensors to proactively identify and block threats in the cloud before they can reach you. It's a lot like having a global neighborhood watch group, keeping an eye on your business.

“Trend Micro understands the way small businesses want to work, and they deliver security solutions that don't get in the way of these businesses but protect their data wherever it exists.”

Sean Watson,
Managing Director, Owner,
Tranquil IT,
Bishop's Stortford, UK

WORRY-FREE™ BUSINESS SECURITY SOLUTIONS

Trend Micro™ Worry-Free™ Business Security solutions provides fast, effective, and simple-to-manage protection, allowing you to use your computers without fear of interruption or data loss.

KEY BENEFITS

- Designed to address the needs of businesses with limited IT staff and resources
- Easy to install and use, no IT expertise required
- Protects all your computers—One solution for protecting PCs, Macs, and mobile devices
- Stops threats in the cloud—before they can reach you're your network and computers
